## We can rely on plastics

It is hard these days to imagine life without plastic. In the course of the last hundred years plastics have taken over almost every area of modern existence and this is largely due to the many advantages of this versatile material: as hard as steel but much lighter, as clear as glass but unbreakable - these are but a few of the many talents of plastic.

Plastics can be moulded into any shape and can take on what-ever character is required: Qualities such as hardness, unbreakability, elasticity, temperature-resistance or chemical resistance can be regulated almost limitlessly.

No wonder that those in the construction industry rely heavily on plastic. The black WOLF PLASTICS construction bucket is not only a robust container for construction materials but it can also be used as a long-term piece of equipment on the building site. Up to 25 kg are lifted onto scaffolding several times a day. So this is no single-use product. And even if it was, it could be professionally recycled and be reincarnated into its next life cycle.
