Buckets

Household / Square / Construction

The bucket is one of the most practical inventions known to humankind, comparable to the invention of the wheel. A world without buckets is unimaginable and they have innumerable applications. In the house, for foodstuffs, paint or construction; each area of life has its own requirements. WOLF PLASTICS wants to do justice to all of them.

WOLF PLASTICS: We live
out our best service
principle afresh every day.

And here's the basket case.

Baskets and stacking crates are a must for packaging specialists. Robust, attractive and durable, they have only one desire: to transport our customers' goods and store them in a space-saving way.

Squaring the circle

We have nothing to spare, particularly space: Square buckets are popular for making best use of Euro and industrial pallets, where they make possible substantial savings in terms of transport and storage. Corners and edges can be a distinct advantage here.

	 EV0500	 EV1600
Volume	5.000 ml	16.000 ml
D x d x H	246 x 189 x 169 mm	352 x 248 x 283 mm

Size | Tolerance deviation +/- 1 mm possible.
Handle | MBGR: Metal handle with roller grip.
Lid | UD: Universal lid. Lid overlap approx. + 1 mm.

WOLF PLASTICS: We live out our best service principle afresh every day.

Square, practical...

From luxury foods to chemical products the square bucket is always the right choice where storage and transport space has to be used to its best advantage. Suitable for pallets, conical and stackable, this bucket is perfectly suited to the most extreme circumstances.

WOLF PLASTICS:
We never lose sight of our world.

We can rely on plastics

It is hard these days to imagine life without plastic. In the course of the last hundred years plastics have taken over almost every area of modern existence and this is largely due to the many advantages of this versatile material: as hard as steel but much lighter, as clear as glass but unbreakable - these are but a few of the many talents of plastic.

Plastics can be moulded into any shape and can take on whatever character is required: Qualities such as hardness, unbreakability, elasticity, temperature-resistance or chemical resistance can be regulated almost limitlessly.

No wonder that those in the construction industry rely heavily on plastic. The black WOLF PLASTICS construction bucket is not only a robust container for construction materials but it can also be used as a long-term piece of equipment on the building site. Up to 25 kg are lifted onto scaffolding several times a day. So this is no single-use product. And even if it was, it could be professionally recycled and be reincarnated into its next life cycle.
